THEO DE BRUYN BV
SINCE 1993

TDB COMBI LEVELLER

If you're looking for a leveller that perfectly complements your loader or skidsteer and also allows the use of a bucket during your work, then the TDB Combi Leveller is the ideal choice!

What to expect?

The TDB Combi Leveller is fairly straightforward, but it certainly doesn't lack the necessary features. It's a combination of a leveller and a bucket, which naturally brings a lot of advantages during your work. All the controls of the leveller are housed under a cover, providing protection for the mechanisms while also giving the leveller a clean appearance.

The Leveller in real life

Hydraulic doors option available
Control the doors using joystick operation from the cabin.

Bucket and leveller combined in one
No more unnecessary switching between attachments.

Optimal compaction
The material weight in the bucket creates optimal compaction.

Without lubrication.
No mess with grease, thanks to a lubrication-free design.

Quick and easy attachment.
Connect using two hydraulic couplings and one 10-pin connector.
