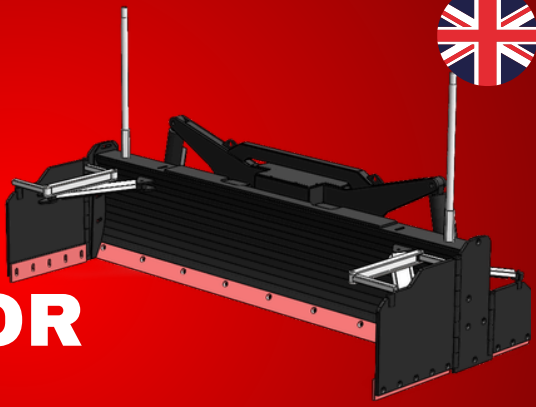
TDB EXCAVATOR BLADE



If you're the operator of an excavator instead of a Skid Steer or Loader, then the TDB Excavator Blade is most likely the solution you're looking for!

What to expect?

The TDB Excavator Blade is perfectly suited for mounting on an excavator. It can function as a grader and as a push blade, depending on the machine it's attached to and the tasks you want to perform. All the controls for the blade are integrated under a cover, which not only protects the mechanisms but also gives the blade a clean appearance.

The Blade in real life

Both Grader and Push Blade
Functions as a grader and a push blade, depending on the machine.

Bluetooth connection
Bluetooth connection for control between the cabin and the blade.

Without lubrication
No mess with grease, thanks to a lubrication-free design.

Option for hydraulic doors
Control the doors using joystick controls from the cabin.

Quick & easy coupling
Connect using two hydraulic couplings and one 10-pin connector.
